## Professional Broadcast Quality Video Subtitling Solution

**SubTitlingPro** is a Multi Language, Professional, and Low cost subtitling solution for broadcast environments

It is a software system that uses the Automation features of the Pinnacle™ Deko line of product, to produce a subtitling solution that is simple yet powerful enough to fit in any media environment that is planning to acquire a new subtitling system, or upgrade their old systems

### Features

- Unicode based system offering Multi-Language support; All languages supported by Microsoft™ Windows™ Operating System (Right -To-Left or Left -To-Right)
- Supports up to 3 lines of subtitles with any choice of language and orientation for each line
- A single, simple, intuitive user interface for both data entry stations and execution stations
- Client-Server architecture. Data is stored in a database for complete archiving and re-execution purposes
- Scalable to virtually any number of execution and data entry stations
- Flexible, low-cost licensing method per subtitling execution stations and data entry stations
- Compatible with Pinnacle Deko line of products with the automation option enabled including Deko100, Deko500, & FXDeko
- Support for any font, style, position, effect for the subtitles that the Deko machine can produce as a character generator. those settings are saved as Deko templates that SubTitlingPro software uses

The system is being implemented in many TV stations and has proved to be a turnkey Subtitling solution. It requiring minimal time for initial installation, Minimal training due to the simple intuitive user interface, and reliable enough to require almost no call support after initial installation by the clients.

Subtitles Execution /Data Entry Form

Subtitling execution is as simple as pressing the CTRL computer keyboard screen. The subtitling lines appear on the video output monitor as your are holding down the CTRL key, and cleared upon the release of that key. The system then moves to the next page which is ready for display upon pressing the CTRL key again

### System Requirements:

#### Subtitling Execution machine:

Pinnacle Deko100, Deko500, or FXDeko with Windows™ NT4.0 SP6a/Windows2000 SP2, Deko machine software with Automation Option enabled

#### Data Entry machine minimum requirements:

PC with Intel™ PII Processor, 64MB RAM, 4GB HDD, 1024x768 Display, 10/100 Network Card
